

Then my life was completely changed when Mr. Brandenburg decided that it was his choice weather or not, we were to receive a vaccine that is effective. I still struggle with the choice YOU made on December 24-25, 2020. Why do you think you can just decide for someone, especially when they think they are doing the right thing to protect their family, friends, and patients! How dare you do such a thing! I know there are many people that do not believe that COVID-19 is real, but that is beside the point. You are entitled to your own opinions, but you are not entitled to make a choice for someone else. You should have never done what you did. I hope that someday you will realize that the world does not revolve around Steven Brandenburg! You were and are 100 percent in the wrong, regardless of your personal beliefs. You were once a pharmacist, someone that people rely on in times of need. Not only did you betray my co-workers, but you also betrayed your profession!! I can only hope that you will someday realize what you have done!
